Dear Mr. Fittipaldi:

Enclosed please find the final report on the Asbestos Management Seminar held in Ramstein, FRG. Attached to the report are the course roster and the course evaluation analysis with comments. Under separate cover we are sending a copy of the course notebook.

This completes the requirements of Contract No. DACA88-88-D-0020, Delivery No. 0004.

We look forward to working with USA-CERL on future training activities.

Sincerely,

Dr. Steven D. Hottman

Final Report
on
Asbestos Workshop at Ramstein AFB, FRG

The Asbestos Management Seminar was held August 1-4, 1988, at Ramstein Air Force Base, Federal Republic of Germany. The seminar was lead by Georgia Institute of Technology personnel, Mr. David Mayer, Mr. Mark Demyanek, and Ms. Toni Hurley.

The seminar was attended by forty-eight (48) participants (see attached roster). Each participant was asked to complete a course evaluation at the end of the workshop. The analysis of the evaluations is attached.

The seminar was very well received by those attending and completing evaluations. The primary complaints were with the facilities, both teaching and lodging. The level of presentation was rated excellent, and the overall instruction was rated very good (4.6 on a 5-point scale). More specifics on FRG regulations were suggested; it was assumed that the German consultant would be the primary resource in this area, but this was apparently not the case. It is anticipated that in future non-US offerings there will be adequate preparation time for special requirements.

Asbestos Management Seminar
August 1-4, 1988

COURSE EVALUATION

ASBESTOS MANAGEMENT SEMINAR

FRANKFURT, WEST GERMANY

AUG. 1-4, 1988

WOULD YOU RECOMMEND THIS COURSE TO ANYONE ELSE IN YOUR OFFICE?(YES/NO-COMMENTS)

YES. |||||

NO ||

COMMENTS:

There is no one else.

Excellent course.

I would recommend it to the Safety Officer.

I would most definitely recommend this course to my environmental staff.

Informative course.

At least for an alternate Asbestos Control Officer and Safety Officer.

This was a good course.

I would recommend this course to our Environmental Officer.

Too detailed for higher management and not detailed enough for lower worker types.

WOULD YOU RATE THE FACILITIES/LOCATION?(POOR, FAIR, EXCELLENT-COMMENTS)

POOR

FAIR ||||

EXCELLENT |||||

COMMENTS:

Could have used desks or tables.

Dinner could have been better.

Food was not too good. Have to pay for mineral water. Beds were terrible-saggy.

AF has too much money.

Kind of close(difficult to open books fully).

Air condition system-bad!

The best that I have attended.

All facilities used were within easy walking distance. The total contracting of bedding and meals was a good idea.

Seating was a little close.

The class room could be better.

Food was poor.

Room was too cold.

IS THE MATERIAL PRESENTED AT THE CORRECT LEVEL FOR THIS GROUP?(YES/NO-COMMENTS)

YES |||||

NO

COURSE EVALUATION

COMMENTS:

Could be geared a little more toward specific requirements for host nation-as information becomes available.

More specifics for FRG.

Very good.

More Europe oriented would be better.

It would be useful to have more material which addressed the Army European situation.

The material was presented very well.

Material was well organized and covered everything needed.

In general-yes: For Germany-no.

Could have been more detailed.

AT SUGGESTIONS FOR IMPROVEMENT DO YOU HAVE? SHOULD ANY SUBJECTS BE ADDED OR DROPPED?

Why not throw in Inspection certification?

Continue having German(Host Nation) representation.

Drop disposal. Completely different in FRG.

More information on OSAREUR problems. How to order respirators, obtain proper training.

Good in my opinion.

I recommend on site exercise-walk through a building. Explanations should be added.

More group work.

Classroom with tables would allow better handling of the notebook.

The TUEV speaker should (1)speak english more fluently and (2) he should be more informed of the subject matter presented prior to his block of instruction.

More European facts vs. USA requirements.

More about German laws and the OSAREUR situation.

Some information should be in more detail.

Drop Public Relations talk.

Be more specific in regard to HN requirements.

More information on how this applies to OSAREUR.

Add: Disposal methods in FRG, Medical Surveillance for LN workers, and Laws and Regulations within FRG about asbestos. Drop: Disposal methods in the States.

Seminar should be longer.

Include a beginning to and reasonably complex asbestos removal effort with detailed overhead (procedures, regulations referenced, equipment lists, etc).

WHAT TYPE OF ADDITIONAL TRAINING DO YOU FEEL WOULD BE NECESSARY FOR YOURSELF OR PEOPLE IN YOUR OFFICE?

Some training on how to train people (in-house work force) on protecting themselves.

How to conduct a Building Survey.

COURSE EVALUATION

GENERAL COMMENTS:

Could have been more geared to European standards, but I realize the difficulty of that. Training should be offered on a periodic basis.

Would like to see more material on how to best get the survey and abatement work done in Europe.

Overall, this course was very good. Before I attended the course I did not have any knowledge except that asbestos is dangerous to human beings.

Very helpful.

Very professional performance.

Further management courses on this issue are required!

Good overall course.

Speakers were articulate.

Good course. Very helpful to talk to other Asbestos Control Officers.

Interested to the extent this information applies to acquisition and disposal of leased facilities.

We need more training courses like this for B&G, UT and Safety personnel.

Good course.

COURSE EVALUATION

Inspector training course.

More practice, visits, discussions of actual problems in other MILCOMS.

Inspector training.

Asbestos testing, respirator use, asbestos identification.

Training for asbestos inspector.

Requirements of German Government with regards to health standards, surveillance/respirator requirements, and disposal/abatement requirements.

Annual review.

All the people in my office should take this course.

Asbestos inspector course.

Additional training in taking samples and testing.

Asbestos inspector.

The inspectors for construction should go to the inspectors course.

A similar course held by a German institute with German topics added.

Abatement training for removal.

WOULD YOU RATE THE OVERALL INSTRUCTION?(1,2,3,4,5; 1-highest; 5-lowest--COMMENTS)

1 _____ 2 _____ 3 1 4 |||| 5 ||||

COMMENTS:

Very professionally done.

Excellent.

Well informed, articulate group.

Very professional.

Very good.

The instructors have the art to present the material.

The instructors were well organized and well informed.

WOULD YOU ATTEND AN ASBESTOS INSPECTOR CERTIFICATION COURSE IF OFFERED IN THE SAME FORMAT?
(YES/NO--COMMENTS)

YES |||| NO |||

COMMENTS:

Should be LN technical person.

Should be LN technical person.

I would attend an asbestos inspectors course.

Not appropriate for UK.

Definetely for sure, courses like this seem important.

If more specific German topics are added.

If allowed by Management, I would attend.
